

Best New Building Surveying Practice 2017 - North West England

Mason Wright Associates are a leading surveying practice operating in the North West of England. We spoke to Graeme Wright to learn more about the firm and the services it offers.

Mason Wright offer a practicable, reliable and friendly service to all its customers and partners, working closely with them to ensure excellence, as Graeme highlights.

Here at Mason Wright, we are a modern, dynamic and highly professional surveying practice of independent Chartered Surveyors with extensive experience within the surveying and property industries, with the knowledge of the local property market and the varying property archetypes being able to offer their clients the best possible advice.

There is complete professionalism in every aspect of our work, from the instruction through to attendance, with a key focus on delivering extraordinary levels of service. We specialise in RICS Building Surveys, RICS Condition Reports, RICS HomeBuyer Reports, Residential and Commercial Valuations and Specific Reports. MWA's highly qualified and RICS accredited Chartered Surveyors have extensive local knowledge of the property market and the varying property archetypes being able to offer their clients the best possible advice.

Overall, it is the practice's disciplined and meticulous

surveying approach using both the traditional and modern techniques, and latest technology available allows it to stand out from the rest, and moving forward continuing to provide this exceptional level of service is the firm's priority, as Graeme concludes.

"Ultimately, Mason Wright Associates has gained a significant, strong and dependable reputation in a short period of time for providing a high level of professional service, and our aim is to continue this whilst expanding our services further afield."

Best International Architecture Practice - Japan

YDS Architects is an award-winning international office that strives for innovation in design. We profile the firm to learn more and explore the secrets behind its success.

Established in 2008 by Yoshitaka Uchino, YDS Architects offers several services of architecture design, urban planning, exhibition design, furniture design, and creation of concept. Their clients are individuals and companies including Mitsubishi Jisho Mitsui-Fudoshan which are giant real estate companies in Japan.

YDS Architects think that architects should be more visionary with philosophy. When creating architectures and cities, the practice starts with making basic concept based on the five principles. Nature, MA/Void, Spaces of Agora, Spaces of path, Symbolism. Nothing is taken for granted for them as they pursue stimulating concept and design.

The firm's latest projects which reflects their concept most are House K and Misora Kindergarten. House K is a simple white box with the terrace and the garage. In House K, the intention is to create a void which responds to the city as well as to the interior spaces. Nature and the architecture stimulating with each other, spaces expand to infinity. By employing simple spatial forms as a methodology,

the practice seeks to integrate East and West.

To create new and stimulating designs, Yoshitaka is always thinking about architecture and cities. He likes travelling and visiting modern architectures and villages and cities is important design source for him. This year, he has visited Europe, US, Mexico, and he visits several works like San Cristobal by Louis

Barragan, Farnsworth Modern Museum by Tadao Ando and many others.

Ultimately, with more and more architectures and cities that has clear-out visions and designs are demanded in the world, YDS Architects tries to get the commissions overseas as well as in Japan.
